Statistical Applications and Research

Most of the faculty at the Statistical Center are supported for a fraction of their time on an R01, Statistical Methods for Clinical Studies. Dr. LeBlanc is the PI. The emphases currently are design and analysis strategies for Phase III trials and survival analysis (particularly graphical and other exploratory methods). Methodological publications are given below.

Methodological Publications

1998

1999

2000

2. Mick R, Crowley JJ, Carroll RG. Phase II clinical trial design for noncytotoxic anticancer agents for which time to disease progression is the primary endpoint. Control Clin Trials 21(4):343-359.

2001

2002

2003

2004

Statisticians usually give presentations at the Group Meeting on some aspect of the design, conduct, or analysis of cancer clinical trials. The titles of these presentations since 1998 are:

• Phyllis Goodman: Design of the Prostate Cancer Prevention Trial (PCPT). Fall 2003.
